Our Company

Established in 1975, Berja is a privately owned Canadian company that has complete capability in a diversified range of industrial services. For industrial construction projects we are capable of providing combined Electrical/Instrumentation Tubing services in the Oil & Gas, Chemicals, Pulp/Paper, Mining and Petroleum industries throughout Canada and globally.

Our customers include major corporations such as ESSO, Air Liquids Suncor, Shell Oil, and Pemex, Kuwait Oil Company, and Schlumberger. We have also provided our services on sub-contract to a number of EPC general, mechanical, and electrical contractors including owner clients.

Within our scope of capacity we can provide maintenance services, steam or glycol heat tracing, commissioning, shut down, and start up assistance. The type of construction work we have performed has included the installation of pneumatic and electronic instrumentation, compressor controls, instrument

panels and enclosures, instrument air sub headers, tubing, raceway, and associated structural supports.

Our shop facility will provide you with all of the related support services inclusive of maintenance calibration, overhaul and rental of all pressure, temperature, and flow measurement devices. The shop division is environmentally controlled, has ERCB approval, and is staffed by some of the most qualified technicians in the industry.

We are committed to providing the finest quality of services and most conscientious personnel available. Through constant retraining, safety preparedness, commitment to teamwork, and the active encouragement of open communications we feel our customers shall not be disappointed.

Please accept this brief introduction of BERJA for your reference and do not hesitate to call to discover further how we can assist you in your instrumentation requirements.
