4015-53 Street - Athabasca, Alberta, Canada - T9s 1A7

The Saddle Bag Weight™ is manufactured in our own facility in Athabasca, Alberta, Canada. This ensures the highest quality control and enables us to customize our products to suit specific customer needs in a very limited time frame.

Advantages

- Environmentally friendly no leaching of lime or sulphur
- Non-biodegradable after installation and easily removed if required
- Specialized equipment ensures fast loading
- Engineered lifting tool available for weight installation
- Off loading tool available for stock piling (allows for unloading multiple weights at one time)
- No pallets to return or clean up from job site
- Our unique and patented strapping design does not allow The Saddle Bag Weight™ to fall off of line pipe like other soft weight designs do
- Low center of gravity eliminates the need for an extra man to hold weights upright while installing
- No extra men and equipment needed to reposition overturned weights when lowering in
- Custom design available for a specific type of pipe (fiberglass, plastic or steel)
- So versatile it can be used on a variety of pipe sizes
- Easy to secure on a trailer and less movement when hauling
- Reduces safety problems during installation
- No bolts or hand tools required to install
- No manual handling (joining of weight halves)
- Simple and Efficient installation reduces crew sizes and labor requirements
- No rock shield required
- The Saddle Bag Weight™ preferred ballast is screened dry sand
- No damage to pipe when installed
- Eliminates the need for sand bags when separating multiple pipelines
- May be used as a set-on weight due to the low center of gravity
- Eliminates uncontrolled rolling of weighted pipe into trench
