## Welcome to WISE

**Improve your well intervention operations with the industry's best personnel & equipment.**

**Our commitment to our industry is partnership, our focus is service delivery, our strength is our team of experienced personnel coupled with industry leading equipment technology, our culture is quality and safety excellence. The outcome is comprehensive well intervention service solutions designed to improve well intervention operations and optimize reservoir performance.**

**Proudly serving the North American oil & gas energy markets WISE service solutions currently specialize in Deep - Ultra Deep Coiled Tubing Services, High Pressure Stimulation Services & Multi-Conveyance Downhole Services.**

## Coiled Tubing

Revolutionary Coiled Tubing equipment designed to service today's complex wellbore designs. High capacity tubing capabilities of up to 25,000' (7,600m) of 2" tubing, 20,500' (6200m) of 2 3/8" tubing. Conventional unit configuration for diverse operating functionality. HR680 and HR6100 Injector heads for reliability, high performance operations & extended reach applications. Regulation compliant 10K & 15K pressure control equipment and controls for safe functionality in all well conditions. On board work string management system for added safety features and cost reductions during operations.

## Stimulation

Industry leading 10K pumping equipment for remedial pumping needs. Twin 1,000 HP and 2,250 HP Quints for low to high rate / high pressure pumping needs for Coiled Tubing support, Service rig support, Snubbing support, Multi-zone completion support and Auxiliary frac pump support. Chemical add and mixing capabilities, data capture, data interface, simple controls, operator focused functionality, environmental regulation compliant.

## Downhole

Intervention BHA equipment for Coiled Tubing or Threaded Pipe conveyance methods. A tool box designed for today's complex wellbore intervention needs. Extended reach tools, Milling tools, Stimulation tools & Coil tubing fishing tools. Unique products offering specialized features to increase quality, reliability and address inherent downhole problems discovered over time. Fit for purpose component designs for a range of well environments & compatibility between completion and intervention BHA designs for effective low risk downhole operations.
